Function	Command	Purpose/Effect
Complexity Choice	Choice between 4 options [0, 1, 2, 3]	Chooses the level of complexity of the model the user wishes to use. The higher the number, the more complex and slower the model.
Custom Input Prompt	Any input	Gives the model a custom input. Only appears if Custom Prompt was selected
Custom prompt selection	"C"	Indicates that the user wishes to use custom input for the text generation. Appears on the Mode Select screen
Delete Model	"1"	Takes the user to a screen that allows them to delete a preexisting model unique to them. Appears on the Model Select screen
Delete Model Confirmation	"Y" / "N"	If "Y", confirms the deletion of the model specified in the Delete Model screen. If "N", returns back to the Model Select screen and does not delete the model. Appears after the user has selected "Delete Model" and has chosen a model to delete
Download Models	"Y" / "N"	If "Y", downloads the models if the user does not already have them. If "N", exits the program. Only appears if the user does not have the models installed
Exit the program	'quit' / Ctrl-C	Immediately quits the program
Login	(Username), (Password)	Logs in a valid user by hashing the password and matching the credentials with the 'users' text file
New Model	"0"	Takes the user to a screen that allows them to create a new model unique to them. Appears on the Model Select screen
New Model Data	Name of text file within the / Storyteller directory	Assigns a text file to the new model for it to be based on. Appears after "New Model Name" has been entered

Function	Command	Purpose/Effect
New Model Name	Any name, as long as the model does not already exist	Decides the name for the new model. Appears after the user has chosen "New Model"
Online Help	'help'	Opens the 'user guide' PDF
Prompt from text file selection	"T"	Indicates that the user wishes to use a prompt from the model's text file for the text generation. Appears on the Mode Select screen
Register	(Username), (Password)	Registers a new user and records their encrypted details in the 'users' text file. Works only if the user does not already exist
Select Model	Corresponding number as shown on screen	Chooses a model to be used for a variety of purposes. Is used in the Model Select screen and the Delete Model screen
